

# INTERACTIVE JOHN

---

## John Dahl · UI Developer

An enthusiastic developer, I have a passion for creating high performance, hand-coded, reusable components that are semantic and accessible to all users. By coding with best practices in mind, I ensure that pages render smoothly and quickly, while also being maintainable. I obsess over pixels on the screen making sure they match the site designs perfectly. I also understand that sometimes you have to work extended hours to meet critical deadlines when necessary.

## Experience

### NEIMAN MARCUS

#### Software Development Engineer - Cloud Services, UI, ADA

November 2017 - Present | Irving, TX

- Build maintainable, reusable, and testable components for neimanmarcus.com
- Work in an agile environment with project managers, scrum masters, analysts, tech leads, developers and business partners to ensure continuity.
- Coordinate with other developers and review PR's to ensure best practices
- Fix defects, bugs, and ADA compliance issues

### NEIMAN MARCUS

#### UX/UI Designer

November 2016 - November 2017 | Irving, TX

- Constructed prototypes from site designs with HTML, CSS, and JavaScript
- Built UI component library and style guide for the eCommerce team
- Tested prototypes across all browsers and mobile devices
- Consulted with product teams to recommend and implement best UX/UI practices

### INIXTA TECHNOLOGIES, INC.

#### UX/UI Director & UI Developer

March 2013 - November 2016 | Albuquerque, NM

- Designed construction software, apps, and database architecture
- Lead off-shore team of 8 developers
- Set up, maintained, and managed Apache servers
- Managed and maintained code base using GitHub version control repository
- Built custom software enhancements and UI features with JavaScript

### INTERACTIVE JOHN

#### UX/UI Designer & UI Developer

June 2008 - November 2016 | New York, NY
