

INTERACTIVE JOHN

John Dahl · UI Developer

An enthusiastic developer, I have a passion for creating high performance, hand-coded, reusable components that are semantic and accessible to all users. By coding with best practices in mind, I ensure that pages render smoothly and quickly, while also being maintainable. Self-directed and highly organized, I strive for clear communication among all teams. I also understand that sometimes you must work extended hours to meet critical deadlines when necessary.

Professional Development Experience · 11 Years

TEKsystems, Inc.

UI Developer @ Southwest Airlines Co.

September 2018 - Present | Dallas, TX

- Design, write, and test company standard code according to Customer requirements
- Document technical decisions, pre-production testing, and instructions that will make other developers faster and more effective
- Support team with production support for product launches (Command Center)
- *Highlights:* Worked with other tech leads to redesign the on-boarding process for new UI developers, presented company specific unit testing techniques at a UI Guild meeting, and conducted technical demonstrations for pre-production tasks

NEIMAN MARCUS

Software Development Engineer - Cloud Services, UI, ADA

November 2017 - September 2018 | Irving, TX

- Built maintainable, reusable, and testable components for neimanmarcus.com
- Worked in an agile environment with project managers, scrum masters, analysts, tech leads, developers and business partners to ensure continuity
- Documented technical expertise and conducted knowledge transfer meetings

NEIMAN MARCUS

UX/UI Designer

November 2016 - November 2017 | Irving, TX

- Constructed prototypes from site designs with HTML, CSS, and JavaScript
- Built UI component library and style guide for the eCommerce team

INIXTA TECHNOLOGIES, INC.

UI Technical Lead

March 2013 - November 2016 | Albuquerque, NM

- Designed construction software, apps, and database architecture
